ABSTRACT

This report provides statistics on the revenues, expenditures, debts, and financial assets of United States public school systems having enrollments of 5,000 or more students for the period ending June 30, 1982. Some findings include: revenue from state governments continues to contribute an increasing share of public school system funding; the proportion of revenue contributed to public schools by the federal government has declined; salaries and wages continue to be the largest expenditure area; and while school system indebtedness increased, payment of long-term debt principal exceeded new debt issues for the third straight year. Tables 1 and 2 display national totals of public school financial data; tables 3 and 4 include statewide aggregates for general revenue and general expenditures, with corresponding percent distributions in tables 5 and 6. Table 7 presents state totals for indebtedness and cash security holdings. Table 8 contains financial statistics for 1,812 public school systems; per pupil amounts for these same systems appear in table 9. The higher education expenditure data in this report represent only a small portion of all publicly operated higher education institutions. (MD)

ACKNOWLEDGMENTS—Henry S. Wulf, Chief of the Finance Branch, directed the preparation of this report under the general supervision of Vance Kane, Assistant Chief for Programs. Lawrence R. MacDonald coordinated data collection and review. Freda M. Cox and Lisa A. McNellis reviewed the school finance data and provided technical assistance. Maurice Criz, Senior Advisor, was responsible for planning and review of this publication.

Mildred Y. Keull performed the computer operations under the supervision of Judith Jennings, Chief of the Computer Utilization Branch.

Corrine W. Davis supervised the preparation of publication copy, assisted by Esther Fogwell and Ruth Samuels.

State and local officials throughout the country provided information for this phase of the 1982 Census of Governments. Their cooperation is gratefully acknowledged.

For information regarding data in this report, contact Lawrence R. MacDonald, Governments Division, Bureau of the Census, Washington, D.C. 20233 (301/763-7664).

A census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 1982 census, similar to those taken since 1957, covers four major subject fields--governmental organization, taxable property values, public employment, and governmental finances.

Volume 4, Governmental Finances, contains five parts that cover the entire range of State and local government finances in fiscal year 1981-82: No. 1, Finances of Public School Systems; No. 2, Finances of Special Districts; No. 3, Finances of County Governments; No. 4, Finances of Municipal and Township Governments; and No. 5, Compendium of Government Finances.

This report provides statistics on the revenue, expenditure, debt, and financial assets of school systems, presented for the Nation, for States, and for individual school systems having 5,000 or more enrollment.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope of the Census Bureau's school finance data collection activities, major findings of the 1981-82 survey, and sources and limitations of data.

Tables 1 and 2 display national totals of public school financial data. Statewide aggregates for general revenue and general expenditure appear in tables 3 and 4 with corresponding percent distributions in

tables 5 and 6. Table 7 presents State totals for indebtedness and cash and security holdings.

Table 8 contains financial statistics for 1,812 public school systems with enrollments greater than 5,000. Per pupil amounts for these same systems appear in table 9.

SCOPE

This report includes data on the finances of the following types of publicly operated educational agencies classified by the Bureau of the Census as school systems:

1. Independent school systems
 - a. Elementary and secondary systems operating as independent governmental units and
 - b. Local government higher education systems operating as independent governmental units;
2. Dependent school systems
 - a. Elementary and secondary systems that are integral agencies of county, municipal, township, or State governments; and
 - b. Local government higher education systems that are integral agencies of county or municipal governments.

There are 483 higher education systems in this publication but they exclude the finances of State government institutions of higher education. Tables 1, 2, and 4 display totals for this grouping under the heading "Higher Education."

For a summary of the major types of units that the Census Bureau includes in the universe of school systems, see table A.

The statistics reported for 1981-82 pertain to school system accounting periods

that ended June 30, 1982, or at some date within the previous 12 months, subject to certain exceptions.¹

EXHIBIT: Local institutions of higher education.....	483	3,425

FINDINGS

Public school systems in the United States received \$118.6 billion from all revenue sources and made expenditures totaling \$115.1 billion in fiscal year 1981-82. Total revenue increased \$7.2 billion, or 6.5 percent, and expenditure \$6.2 billion, or 5.7 percent, over the previous fiscal year. Revenue and expenditure increased by 49.6 and 48.2 percent respectively from those reported 5 years ago in the 1977 Census of Governments.

The relative significance of funding from Federal, State, and local sources has changed during the last 5 years (see discussion under "Revenue").

Salaries and wages has remained the largest single component of public school system expenditure.

While school system indebtedness increased by 2.4 percent from \$35.1 billion in 1976-77 to \$36.0 billion in 1981-82, payment of long-term debt principal exceeded new debt issues for the third straight year. Total school system indebtedness was highest in 1979-80 (\$36.5 billion) during this 5-year period.

Assets of independent school districts increased by 52.2 percent from those held at the end of fiscal year 1976-77. Cash and time deposits rose by 43.6 percent and security holdings increased by 67.8 percent.

¹The 1982 fiscal years for Alabama school systems ended Sept. 30, 1982, and those for Nebraska systems, Texas systems, and the Chicago Board of Education closed Aug. 31, 1982.

REVENUE

School system revenue totaled \$118.6 billion in fiscal year 1981-82. This consisted primarily of general revenues of \$118.3 billion and a small amount of employee-retirement revenue (\$337 million).²

Table B shows the distribution of general revenue between intergovernmental and own source revenue. The relationship between these two categories of revenue fluctuates greatly from State-to-State (see table 5). For example, public school systems in New Hampshire derived 88.8 percent of their revenue from own sources and only 11.2 percent from intergovernmental funding. School systems in New Mexico, however, obtained 16.7 percent of their revenue from own sources with the remainder coming from other governments.

Table B. General Revenue of Public School Systems: 1981-82

Interest earnings.....	2,720	2.3
Other.....	1,853	1.6

²State governments administer almost all public employee-retirement systems that cover teachers and other school employees. However, 12 school systems still maintained their own retirement systems in 1981-82: Denver, Colo.; Fulton County, Ga.; Chicago, Ill.; Des Moines, Iowa; Wichita, Kans.; Duluth, Minneapolis, and St. Paul, Minn.; Kansas City and St. Louis, Mo.; Omaha, Nebr.; and Portland, Oreg. The retirement revenue in these 12 systems consisted of \$90 million in employee contributions, \$67 million in State government contributions, and \$180 million in interest earnings.

Revenue from State governments continues to contribute an increasing share of public school system funding (see table C). Since 1977 its share of total general revenue has risen from slightly under 40 percent to over 45 percent. Some States had particularly sharp increases in State revenues between 1980-81 and 1981-82: Alaska (+20.8 percent), New Mexico (+32.1 percent), North Dakota (+50.8 percent), Oklahoma (+25.0 percent), and South Carolina (+30.2 percent). State governments distributed most of their education money as part of basic foundation aid programs but also provided amounts for vocational and special education, transportation aid, food service, and capital outlay.

Table C. Percent of Public School General Revenue by Original Source of Funding

Source	1976-77	1979-80	1980-81	1981-82
Total..	100.0	100.0	100.0	100.0
State.....	39.8	44.7	44.9	45.4

Local.....	52.1	46.3	46.6	47.6
Taxes.....	34.3	28.7	29.0	30.0

The proportion of revenue contributed by the Federal Government to public school systems has declined. After peaking at slightly under 9 percent of all school system general revenue in 1979-80, the Federal share dropped to 7 percent in 1981-82. Federal Government aid totaled \$8.3 billion in 1981-82, down 12.5 percent from 1980-81. It expended \$1.3 billion directly to school systems in 1981-82, a major part of these payments being funded through Public Law 874, commonly called the impact aid program. Most Federal revenue is channeled indirectly to local public school systems through State governments. About \$7.0 billion was distributed under various programs including the Elementary-Secondary Education Act, vocational education, school lunch and milk, and education consolidation and improvement block grants.

The decline in the Federal portion of public school system funding was partly offset by a slight resurgence in tax revenues. These revenues increased by 10.1 percent between 1980-81 and 1981-82 with particularly sharp increases reported in California (+23.2 percent), Florida (+34.6 percent), Nevada (+32.9 percent), and Wyoming (+33.9 percent).

Taxes and parent government contributions comprised 82.2 percent of all general revenue received by school systems from their own sources. Parent government

contributions are amounts appropriated by governments to finance their dependent school systems. Property tax receipts fund the major portion of these contributions. While property tax revenue was the single most important source of locally derived revenue, other taxes were significant for school systems in certain States. Louisiana is unique inasmuch as school systems received approximately \$394 million, or over 67 percent of all 1981-82 tax revenue, from local sales tax collections. Other States with significant amounts of nonproperty tax revenue include Kentucky, New York, and Pennsylvania.

EXPENDITURE

Public school systems expended \$115.1 billion in fiscal 1981-82 including \$158 million in employee-retirement expenditure for school district-administered systems (listed in footnote 2). Table D shows the distribution of general expenditure--i.e., excluding retirement system payments--by object and level of instruction.

Table D. General Expenditure of Public School Systems: 1981-82

Item	Amount (millions of dollars)	Percent
General expenditure, total.....	114,990	100.0
Intergovernmental.....	507	.4
Direct.....	114,483	99.6
Current operation.....	105,400	91.7
Salaries and wages....	71,886	62.5
Other.....	33,515	29.1
Capital outlay.....	6,879	6.0
Construction.....	4,392	3.8
Other.....	2,487	2.2
Interest on debt.....	2,204	1.9
Direct expenditure by level of instruction:		
Elementary and secondary	105,023	91.3
Higher education.....	7,256	6.3

Amounts reported as intergovernmental expenditure include only payments to State governments and local school building and leasing authorities that are classified by the Census Bureau as special district governments. Expenditures made by one school system to another are excluded to avoid totaling duplicative amounts.

Salaries and wages, predominantly teachers' salaries, continue to be the largest object expenditure totaling 62.5

percent of general expenditure in 1981-82. Salary expense increased by 46.1 percent from 1976-77 and 6.2 percent from 1980-81 to \$71.9 billion. Spending for capital outlay declined in 1981-82 for the second straight year to \$6.9 billion, down 7.9 percent from \$7.5 billion in 1980-81.

Coverage of elementary and secondary education finances is far more comprehensive than the coverage given to higher education finances. Expenditure reported for elementary and secondary education includes all units classified by the Bureau of the Census as public elementary and secondary school systems.³

Higher education expenditure accounted for only 6.3 percent of total general expenditure of public school systems. The higher education institution data included in this report, however, pertain to only those institutions classified by the Bureau of the Census as school systems. Most of these systems are locally controlled community colleges.⁴ In many States, though, community colleges are either totally or partially administered and funded by State governments.⁵ State-controlled higher educational institutions (both 4-year and community colleges) are excluded as these are classified as State dependent agencies rather than as local school systems. Thus, the higher education expenditure data in this report represent only a small portion of all publicly operated higher education institutions.⁶

Table 4 contains elementary-secondary and higher education expenditure detail for individual States. States that had

particularly large increases in total elementary-secondary expenditure between 1980-81 and 1981-82 were Alaska (+17.0 percent), Nevada (+15.7 percent), North Dakota (+23.6 percent), South Carolina (+16.7 percent), and Wyoming (+26.8 percent). Public elementary-secondary expenditures in Massachusetts dropped by 5.8 percent from 1980-81 mainly because of reductions resulting from Proposition 2-1/2.

Table E shows, by State, average per pupil amounts for several types of elementary and secondary educational expenditures.⁷ Proper analysis of interstate comparison requires caution. Such factors as cost of living within given areas, extent of special educational programs offered, and transportation requirements can all significantly influence per pupil costs but may not be particularly helpful in describing the quality of basic educational programs.

INDEBTEDNESS

At the end of fiscal 1981-82, indebtedness of public school systems totaled \$36.0 billion. Of this amount, 95.6 percent, or \$34.4 billion represented long-term obligations. Approximately \$2.2 billion of long-term debt was issued in fiscal 1981-82, while \$3.1 billion was retired. This marks the third straight year that retirement of principal has exceeded new debt issued.

Indebtedness figures included in table 7 pertain only to debt issued in the name of an independent school district or by the parent government for a dependent school system. Thus, this report excludes the following debt obligations: debt issued by school building authorities and by certain municipalities (such as Atlanta, Milwaukee, and San Francisco) for the construction of education facilities; general obligation debt not issued distinctly for the support of schools, such as in the District of Columbia and Hawaii; and indebtedness of the Chicago School Finance Authority, a special district government created in January 1980, that had \$569 million outstanding in long-term bonded indebtedness as of August 31, 1982.

³State-by-State descriptions of those units classified by the Bureau of the Census as school systems are given in Governmental Organization (1982 Census of Governments, Vol. 1).

⁴Major exceptions are the following locally controlled 4-year degree granting institutions: University of the District of Columbia, Washburn University (Topeka, Kans.), and the City University of New York.

⁵All or most of the community colleges in the following States are classified by the Bureau of the Census as State institutions of higher education and are, therefore, excluded from this report: Alabama, Alaska, Arkansas, Colorado, Connecticut, Delaware, Georgia, Hawaii, Kentucky, Massachusetts, Minnesota, Nevada, New Mexico, Oklahoma, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, Washington, West Virginia, and Wisconsin.

⁶The forthcoming report Compendium of Government Finances (Vol. 4, No. 5, 1982 Census of Governments) will present data for all public higher education institutions.

⁷The enrollment data used in calculating the per pupil amounts presented in table E is fall 1981 pupil membership from National Center for Education Statistics, "Public School Enrollment, United States, Fall 1981," table 1.

¹Excludes expenditure for interest on debt.²Includes interfund transfers into employee-retirement funds operated by the parent government or by the school system itself, which are omitted from the expenditure data presented elsewhere in this report.

CASH AND SECURITY HOLDINGS

School district governments had financial assets at the end of fiscal 1981-82 amounting to \$21.5 billion. Approximately \$2.1 billion was held in the 12 school employee-retirement funds included in this report. Of the remainder, \$13.7 billion was held as cash and deposits and \$5.6 billion represented securities. Holdings of dependent school systems are excluded from this report since they cannot be separated from the assets of their parent governments.

SOURCES AND LIMITATIONS

The Census Bureau obtained data in this report from four principal sources:

Organization--The research conducted as part of the Census Bureau's 1982 Survey of Governmental Organization identified the universe of public school systems. Consult the report Governmental Organization (Vol. 1, 1982 Census of Governments) for a description of the methodology and the findings of this survey. That report includes extensive tabular presentations on numbers of public school systems, schools, and enrollments. Counts of the school systems in the finance survey will differ slightly from those included in Governmental Organization. These differences occur because the finance survey excludes school systems which, due to overlapping of reporting responsibilities, would cause financial data to be double-counted.

Higher education--Finance data were obtained from questionnaires used in the Higher Education General Information Survey conducted by the National Center for Education Statistics as part of a joint data collection agreement between the Census Bureau and the U.S. Department of Education.

Mail canvass--Statistics for elementary and secondary school systems in Alaska and in the District of Columbia as well as the employee-retirement systems are based on information received in response to a mail canvass of individual systems.

Central collection--State education agencies conduct surveys of elementary and secondary education systems that obtain finance data as part of a larger data collection effort. A high percentage of this information is often compatible with Census Bureau categories. In an effort to reduce respondent burden, the Census Bureau concluded a series of agreements with all States except Alaska to share their data for this survey. The specific data collection procedure used in each State is listed below.

1. Completion of Census Bureau questionnaires by State officials: Delaware, Kentucky, Maryland, Nevada, Oregon, West Virginia, and Wyoming.
2. Compilation from State education agency source documents by Census Bureau staff: Alabama, Hawaii, Idaho, Louisiana, New Mexico, Rhode Island, Tennessee, and Utah.
3. Computer tape reformatted by Census Bureau staff: Arizona, Arkansas, California, Georgia, Indiana, Maine, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, North Dakota, Ohio, Oklahoma, and Vermont.
4. Computer tape of data reformatted by State education agency: Illinois, Iowa, Kansas, Minnesota, Missouri, New York, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.
5. Computer printouts of data reformatted by State education agency: Colorado, Connecticut, Florida, Mississippi, North Carolina, South Carolina, and Virginia.

These central data collection arrangements did not always provide sufficient information to meet all the needs of the Census Bureau survey. In those instances, other sources--most often different State offices--supplied information to supplement the basic data. The most common types of data needing supplementation were school lunch finances, indebtedness, cash and security holdings, and capital fund transactions. The procedures for incorporating these additional data with the core information required careful detailing to avoid duplication or under reporting.

Data in this report are subject to inaccuracies in classification and processing. The Census Bureau exerted effort to keep such errors to a minimum through care in examining, editing, and tabulating the data shown herein.

For information on the availability of school finance data on computer tape, contact Chief, Governments Division, Bureau of the Census, Washington, D.C. 20233 or call (area code 301/763-7366).

ACKNOWLEDGMENT

The generous cooperation of State education agency personnel is gratefully acknowledged. The time and effort extended by these officials made it possible to produce this report while imposing a minimum of respondent burden on local school officials. We also appreciate very much the helpful assistance of local school officials who either provided statistics in the first instance or who resolved data problems.

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

- Represents zero or rounds to zero.
- (NA) Not available.
- (X) Not applicable.

Percent of Public School System Revenue by Original Source of Funding: 1976-77 through 1981-82

Current Operation Expenditure Per Pupil by Public School System: 1981-82

NA Not available.

X Not applicable.

¹Calculated from total school system financial amounts shown in this table.

²Per pupil amounts for 1976-77 and 1981-82 calculated from enrollments obtained in the governmental organization phase of the Census of Governments. 1980-81 amounts calculated from total enrollments supplied by the National Center for Education Statistics.

³To avoid duplication, interschool system transactions are excluded.

⁴Holdings of dependent school systems cannot be separately identified from the holdings of their parent governments and are therefore excluded.

Note: Because of rounding, detail may not add to totals. Revenue from State sources for State dependent school systems is included in intergovernmental revenue from State rather than in parent government contributions.

- Represents zero or rounds to zero.

!To avoid duplication, interschool system transactions are excluded.

Note: Because of rounding, detail may not add to totals.

- Represents zero or rounds to zero.

NA Not available.

¹Minor amounts of short-term indebtedness incurred by independent school systems are included in the long-term indebtedness figures and are not separately identifiable. Short-term indebtedness of dependent school systems in many cases cannot be distinguished from the total indebtedness of their parent governments.

²Holdings of employee-retirement funds are excluded.

³Dependent school system holdings are excluded.

⁴Indebtedness of these dependent school systems cannot be segregated from the general obligation indebtedness of their parent governments.

Note: Because of rounding, detail may not add to totals. Interscholastic system transactions are included in this table, rather than excluded as in tables 1-4.

¹Enrollments for the 1,634 elementary and secondary school systems are for fall 1981 as reported by the National Center for Education Statistics. Fall 1980 enrollments are shown for the 178 local institutions of higher education published in the *Education Directory, Colleges and Universities, 1981-82*, National Center for Education Statistics.

²\$33,430,000 of school bonded indebtedness incurred by the city of Birmingham.

³\$27,905,000 of school bonded indebtedness incurred by the city of San Francisco. San Francisco Unified School District paid \$5.5 million in fiscal year 1981-82 for debt service.

⁴The following amounts (in thousands of dollars) are excluded from the expenditure data shown herein as they are interfund transfers made into the school system's, or its parent government's employee-retirement fund: Chicago, \$44,132; Denver, \$17,120; Des Moines, \$1,220; Fulton County, \$3,914; Hawaii Public Schools, \$50,872; Kansas City, Mo., \$5,895; Minneapolis, \$1; New York City, \$787,961; Omaha, \$3,200; St. Louis, \$6,127; and St. Paul, \$368.

⁵Represents debt issued by the city of Atlanta.

⁶\$116,605,000 of school bonded indebtedness incurred by the city of Atlanta. Atlanta Independent School District paid \$1,062,326 in fiscal year 1981-82 to the city of Atlanta for debt service.

⁷Excludes enrollment and financial data for De Kalb Community College.

⁸Excludes \$569,025,000 (as of Sept. 1, 1982) in long-term debt incurred by the Chicago School Finance Authority.

⁹\$41,290,000 of school bonded indebtedness incurred by the city of Milwaukee. Intergovernmental expenditure represents debt service payments to the city of Milwaukee.

Note: Because of rounding, detail may not add to totals. Interscholastic system transactions are included in this table, rather than excluded as in tables 1-4.

¹\$767 per pupil of school bonded indebtedness incurred by the city of Birmingham.

²\$480 per pupil of school bonded indebtedness incurred by the city of San Francisco. San Francisco Unified School District paid \$95 per pupil for debt service.

³The following amounts (in dollars per pupil) are excluded from the expenditure data shown herein as they are interfund transfers made into the school system's, or its parent government's retirement fund: Chicago, \$100; Denver, \$274; Des Moines, \$38; Fulton County, \$110; Hawaii Public Schools, \$312; Kansas City, Mo., \$153; New York City, \$853; Omaha, \$74; St. Louis, \$101; and St. Paul, \$12.

⁴\$1,581 per pupil of school bonded indebtedness incurred by the city of Atlanta. Atlanta Independent School District paid \$15 per pupil to the city of Atlanta for debt service.

⁵Excludes financial data for the De Kalb Community College.

⁶Excludes \$1,285 per pupil of school bonded indebtedness incurred by the Chicago School Finance Authority.

⁷\$478 per pupil of school bonded indebtedness incurred by the city of Milwaukee.

Definitions of Selected Terms

Major categories for the Census Bureau's classification of governmental finances, as applicable to school systems, are defined below:

Bond Funds--Funds established to account for the proceeds of bond issues pending their disbursement.

Capital Outlay--Direct expenditure for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current operation expenditure.

Cash and Security Holdings--Cash, deposits, and governmental and private securities (bonds, notes, stocks, mortgages, etc.) except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

Construction--Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements and provision of equipment and facilities that are integral parts of a structure. Includes both contract and force account construction.

Contribution From Parent Government--That portion of general revenue from own sources which is appropriated and transferred to a dependent school system by its parent government. Excludes intergovernmental revenue, current charges, and miscellaneous general revenue.

Current Charges--Amounts received from the public for performance of specific services benefiting the person charged and from sales of commodities and services. Includes school lunch sales (gross), tuition paid by individuals, and receipts from centrally administered student activity funds. Excludes amounts received from other governments and interfund transfers.

Current Operation--Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractual services except amounts for capital outlay.

Debt--Long-term credit obligations of the school system or its parent government and all interest-bearing short-term (repayable within 1 year) credit obligations. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individuals to benefits from school system employee-retirement funds.

Debt Outstanding--All debt obligations remaining unpaid on the date specified.

Direct Expenditure--Payments to employees, suppliers, contractors, beneficiaries, and other final recipients of government payments--i.e., all expenditure other than intergovernmental expenditure.

Employee-Retirement Expenditure--Cash payment to beneficiaries (including withdrawals of contributions) of employee-retirement systems. Excludes cost of administering retirement systems, school system contributions to State-administered employee-retirement systems, and noncontributory gratuities paid to former employees.

Employee-Retirement Revenue--Revenue from retirement contributions received from employees and other governmental or private employers, earnings on investment assets set aside to provide income for retirement system purposes and State government contributions. Excludes contributions from the employing school district (which are intragovernmental transfers).

Enrollment--Count of pupils on pupil rolls as determined by the State education agency.

Expenditure--All amounts of money paid out by a school system--net of recoveries and other correcting transactions--other than

for retirement of debt, purchase of securities, extension of loans, and agency transactions. Note that expenditure includes only external transactions of a school system and excludes noncash transactions such as the provision of perquisites or other payments in kind.

Fiscal Year--The 12-month period at the end of which the school district determines its financial condition and the results of its operations and closes its books.

General Expenditure--All school system expenditure other than that classified as employee-retirement or other insurance trust expenditure.

General Revenue--All school system revenue except employee-retirement or other insurance trust revenue.

General Revenue From Own Sources--All general revenue exclusive of intergovernmental revenue. Includes taxes, contributions from parent governments, current charges, and miscellaneous general revenue.

Interest Earnings--Interest earned on deposits and securities including amounts for accrued interest on investment securities sold. However, receipts for accrued interest on bonds issued are classified as offsets to interest expenditure. Note that interest earnings shown under general revenue do not include earnings on assets of employee-retirement systems.

Interest Expenditure--Amounts paid for use of borrowed money.

Intergovernmental Expenditure--Amounts paid to other governments as fiscal aid in the form of shared revenues and grants-in-aid, school building authority payments, or in lieu of taxes. Excludes amounts paid to other governments for purchase of commodities, property, or utility services, any tax imposed and paid as such, and employer contributions for social insurance--e.g., contributions to the Federal Government for old-age, survivors', disability, and health insurance for school district employees.

Intergovernmental Revenue--Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government functions and specific services for the paying government, or in lieu of taxes. Excludes amounts received from other governments for sale of property and commodities. All intergovernmental revenue is classified as general revenue.

Intergovernmental Revenue From Federal Government--Intergovernmental revenue received by the school system directly from the Federal Government. Excludes federal aid channeled through State governments.

Intergovernmental Revenue From State Government--All intergovernmental revenue received from the State government, including amounts originally from the Federal Government but channeled through the State.

Long-term Debt--Debt payable more than 1 year after date of issue.

Long-term Debt Issued--The par value of long-term debt obligations incurred during the fiscal period concerned, including funding and refunding obligations. Debt obligations authorized but not actually incurred during the fiscal period are not included.

Long-Term Debt Retired--The par value of long-term debt obligations liquidated by repayment or exchange, including debt retired by refunding operations.

Offsets to Debt--Cash and investment assets of sinking funds and other reserve funds, however designated, which are specifically held for redemption of long-term debt, including bond reserve funds, deposits with fiscal agents for the redemption of uncanceled debt, and balances in refunding bond accounts held pending completion of refunding transactions.

Other Than Capital Outlay--General expenditure exclusive of capital outlay. Includes current operation, interest on debt, and intergovernmental expenditure.

Property Taxes--Taxes conditioned on ownership of property and measured by its value. Includes general property taxes relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates, and taxes on selected types of property, such as motor vehicles or certain or all intangibles.

Public School Systems--Includes independent school district governments and dependent school systems. Independent school district governments are organized local entities providing public elementary, secondary, and/or higher education which, under State law, have sufficient administrative and fiscal autonomy to qualify as governments. Dependent school systems lack sufficient autonomy to be counted as separate governments and are classified

as dependent agencies of some other government--a county, municipal, township, or State government.

Revenue--All amounts of money received by a school system from external sources--net of refunds and other correcting transactions--other than from issuance of debt, liquidation of investments, or as agency and private trust transactions. Note that revenue excludes noncash transactions such as receipt of services, commodities, or other "receipts in kind."

Salaries and Wages--Amounts paid for compensation of school system officers and employees. Consists of gross compensation before deductions for withheld taxes, retirement contributions, or other purposes.

School Lunch Sales--Gross collections from cafeteria sales to children and adults.

Securities--Stocks and bonds, notes, mortgages, and other formal evidences of indebtedness.

Short-Term Debt--Interest-bearing debt payable within 1 year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

Taxes--Compulsory contributions exacted by a school system for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that school system tax revenue excludes any amounts from shares of State-imposed-and-collected taxes, which are classified as intergovernmental revenue.

PUBLICATION PROGRAM

The 1982 Census of Governments, similar to those taken every 5 years since 1957, covers four major subject fields relating to State and local governments—governmental organization, taxable property values, public employment, and governmental finances.

The results are being issued in one preliminary report and eight volumes, which are described below. Publications order forms for specific reports may be obtained by writing to the Data User Services Division, Customer Services Branch (Publications), Bureau of the Census, Washington, D.C. 20233.

PRELIMINARY REPORT

This report presents preliminary data from the Directory Survey of Local Governments on the number of governments by type.

Number 1. Governmental Units in 1982

VOLUME 1. GOVERNMENTAL ORGANIZATION—1 report (GC82(1))

Data are presented at the national level, by States, and for SMSA's on county, municipal, and township governments by size classes; on public school systems by size of enrollment, by grades provided, and by number of schools operated; and on special district governments by function performed. The report also includes a summary description of governmental structure in each State.

VOLUME 2. TAXABLE PROPERTY VALUES AND ASSESSMENT/SALES PRICE RATIOS—1 report (GC82(2))

This volume presents data on amounts of assessed value (gross and net) officially determined in 1981 for local general property taxation, for counties, and for each city having a 1980 population of 50,000 or more, with totals for States. The data include estimates of locally assessed realty distributed among major use categories.

The report also provides statistics, based on a sampling within 2,000 local assessing jurisdictions throughout the United States, on real properties involved in measurable sales during a 6-month period of 1981. Statistics include assessment-sales ratios and dispersion coefficients applicable to single-family (nonfarm) houses and certain other realty.

VOLUME 3. PUBLIC EMPLOYMENT—3 reports (GC82(3) 1 to 3)

Number 1. Employment of Major Local Governments—This report presents statistics on October 1982 employment and payrolls of individual major local governments. Data are presented individually for all county governments, municipalities (and townships in selected States) with 10,000 or more population, school systems with 5,000 or more enrollment, and special districts having 100 or more full-time employees.

Number 2. Compendium of Public Employment—This report is a comprehensive summary of public sector employment, payrolls, and employer costs for selected employee benefits as of October 1982. Employment and payroll data are shown by governmental function. Data are summarized nationally and by States. Local government statistics are also summarized for each county area; by population-size group for counties, municipalities, and townships; by enrollment-size group for school districts; and by employment-size group for special district governments.

Number 3. Labor-Management Relations in State and Local Governments—This report is a national and State-by-State summary of labor-management relations in State and local governments as of October 1982. Statistics include the number and percent of employees who belong to an employee organization; number of governments with a labor relations policy; number of contractual agreements and number of employees covered by contractual agreements; number of employee bargaining

units; and work stoppages which occurred between October 16, 1981, and October 15, 1982.

VOLUME 4. GOVERNMENTAL FINANCES—5 reports (GC82(4) 1 to 5)

This volume presents statistics on revenue, expenditure, debt, and financial assets of State and local governments.

Number 1. Finances of School Districts—Selected financial items are shown for enrollment-size groups of public school systems and individual school systems enrolling 5,000 or more pupils.

Number 2. Finances of Special Districts—Data are shown for selected large districts.

Number 3. Finances of County Governments—Selected financial items are shown for groups of counties, classified by population-size groups, and for individual county governments.

Number 4. Finances of Municipal and Township Governments—Selected financial items are reported for population-size groups of these governments and for individual municipalities and townships having 10,000 or more inhabitants.

Number 5. Compendium of Government Finances—This report is a comprehensive summary showing data for the Federal Government, individual States, and local governments by type of government, and data for State and local governments by States, including a breakdown by type of government. Data are given for county areas, per capita amounts, percentage distributions, and State rankings.

VOLUME 5. LOCAL GOVERNMENT IN METROPOLITAN AREAS—1 report (GC82(5))

This volume presents the census findings for standard metropolitan statistical areas (SMSA's) in three major subject fields: Numbers of local governments by type and size, local government employment and payroll, and local government finances. Data are shown in terms of nationwide aggregates for population-size groups of SMSA's and for SMSA portion of each State, as well as for individual SMSA's and their component counties.

VOLUME 6. TOPICAL STUDIES—5 reports (GC82(6) 1 to 5)

This volume includes the following reports.

Number 1. Employee-Retirement Systems of State and Local Governments

Number 2. Governmental Statistics for Puerto Rico, Virgin Islands, Guam, and Northern Mariana Islands

Number 3. State Payments to Local Governments

Number 4. Historical Statistics on Governmental Finances and Employment

Number 5. Graphic Summary

VOLUME 7. GUIDE TO THE 1982 CENSUS OF GOVERNMENTS—1 report (GC82(7))

This report presents detailed samples of tables published in the 1982 Census of Governments report series.

VOLUME 8. PROCEDURAL HISTORY—1 report (GC82(8))

This report describes the procedures followed in planning and conducting the 1982 Census of Governments.
